

“A fantastic service, it has proved to be a very useful tool for establishing competent tradesmen and suppliers and has a very user friendly interface.”

The Client

Farrans Construction is a well established building and civil engineering contractor with offices across the UK.

Our Contact

Brian Grant
Quantity Surveyor
Farrans Construction Ltd

The Challenge

Farrans Construction Ltd approached BR Network again to assist on this project which was then at Tender stage to find Companies interested in pricing the job. The challenge was to fill every trade a relatively short notice for a project that had not yet been secured.

Over 60 different Trades successfully sourced and delivered within 4 days of instruction.

The Solution

With over 60 trades to fill in four days and two companies required per trade BR Network needed to be quick off the mark.

All Sub-contractors were called and e-mailed to check and confirm interest.

Two dedicated staff were assigned to this project alone to ensure a successful and prompt delivery.

The Project

Rushcliffe Arena Development, Nottingham

The Value

£11 million

The Results

The job was successfully delivered and Tenders sent to BR Network Customers to price.

Farrans Construction Ltd went on to win the project meaning that many of the sub-contractor customers who priced at tender stage went on to secure the work.

Farrans Construction Ltd continue to use BR Network to assist with both Secured and Unsecured work with BR assisting with well over £110 million of projects so far.

Many BR customers have won work and gone on to build strong relationships with Farrans Construction Ltd.

Brian Grant says “I use the BR Network to find sub-contractors throughout the UK. It’s a fantastic service. It has proved to be a very useful tool for establishing competent tradesmen and suppliers and has a very user friendly interface.”
